

H105C9 Conventional - 105 Day

H105C9 is a superb variety for your corn acres that require a hybrid that can offer stability as well as good yield potential in favorable growing seasons. H105C9 is the product of crossing a “workhorse” male with a “racehorse” female. This allows this hybrid to offer stability in less than ideal growing conditions but with good top end potential. Similar to H103C9 but with more top end in exchange for a little less stability.

Quick Description:

- Excellent foliar disease package
- Offers stability and good top end
- Tough hybrid

Maturity	105	Early Plant Vigor	Very Good
Silking (GDU)	1315	Root Rating	Good
Black Layer (GDU)	2570	Stalk Rating	Very Good
Ear Type	Semi-Flex	Goss Wilt	Very Good
Plant Height	Medium	Gray Leaf Spot	Excellent
Test Weight	Average	Northern Leaf Blight	Very Good
Corn on Corn	Very Good	Stalk Anthracnose	Very Good
