

H117SC9 Conventional - 117 Day

H117SC does exceptionally well in areas where summers tend to be hot and dry. It is a workhorse variety that performs very well on marginal ground. Gives good tonnage when chopping for silage and is an excellent fit for grain production on tough soils and in areas where rainfall is limited. Not well suited for grain on highly productive, irrigated acres.

Quick Description:

- Remarkable drought and heat tolerance
- Silage or grain depending upon soil type
- Does very well on tough soils

Maturity 117	Early Plant Vigor Good
Silking (GDU) 1475	Root Rating Good
Black Layer (GDU) 2810	Stalk Rating Good
Ear Type Flex	Goss Wilt Very Good
Plant Height Tall	Gray Leaf Spot Good
Test Weight Very Good	Northern Leaf Blight Very Good
Corn on Corn Good	Stalk Anthracnose Very Good
