

H104SC Conventional - 104 Day

H104SC is a robust hybrid, capable of high silage or grain yields. It is very adaptable geographically, and can tolerate hot and dry conditions very well. Maintaining plant health throughout the season is important due to sensitivity to stalk anthracnose, but otherwise great yield potential.

Quick Description:

- Dual purpose silage or grain
- Widely adaptable
- Heat and drought tolerant
- Excellent test weight

Maturity 104	Early Plant Vigor Very Good
Silking (GDU) 1340	Root Rating Good
Black Layer (GDU) 2630	Stalk Rating Average
Ear Type Semi-Flex	Goss Wilt Excellent
Plant Height Medium Tall	Gray Leaf Spot Good
Test Weight Excellent	Northern Leaf Blight Very Good
Corn on Corn Very Good	Stalk Anthracnose Fair
