

H112C Conventional - 112 Day

H112C brings great top end yield potential to the table while also being a good fit across a variety of soil types and growing conditions. Fungicide application is recommended when looking to push yields due to low resistance to gray leaf spot.

Quick Description:

- Considerable yield potential
- Good fit in varying soil types and growing conditions
- Fungicide treatment highly recommended

Maturity	112	Early Plant Vigor	Very Good
Silking (GDU)	1440	Root Rating	Good
Black Layer (GDU)	2685	Stalk Rating	Good
Ear Type	Semi-Flex	Goss Wilt	Excellent
Plant Height	Medium	Gray Leaf Spot	Average
Test Weight	Good	Northern Leaf Blight	Average
Corn on Corn	Average	Stalk Anthracnose	Average
