23X16

116 DAY

ADAPTABLE

KEY BENEFITS

- Southern adapted hybrid
- Very large robust plant structure
- High yield potential in favorable conditions and solid in drought

DESCRIPTION

Similar hybrid style to H116S, but a much fuller canopy and better husk cover. Great fit for the southern growers as well as western growers for silage. 23X16 brings both drought tolerance and yield potential to the table which goes into making it a great hybrid in areas where rainfall can be unpredictable.

WHERE IT FITS

Across the South in all soil types as both irrigated and dryland.

INBRED SELECTION

Very robust female and an extremely versatile male.

GROWER NOTES

Benefits from fungicide.
