23X90

90 DAY

ADAPTABLE

KEY BENEFITS

- H3751's little brother
- Versatile hybrid with great geographic range similar to H3751
- Quite possibly the strongest Goss' Wilt tolerance in the industry

DESCRIPTION

From New York to Washington, 23X90 can be a great fit for just about any region. It has good yield potential, is very adaptable to different soil types, and shows excellent resistance to Goss's Wilt. This hybrid's adaptability makes it an excellent choice for growers looking to plant across a range of yield environments. It shows very good drought tolerance for dryland production, but is also a good fit for highly productive irrigated acres.

WHERE IT FITS

Any soil type and low to moderately high plant populations

INBRED SELECTION

Shares male with H3751 and a related but earlier female

GROWER NOTES

Great versatility

GEOGRAPHIC REGIONS

NY, PA, MI, MN, WI, ND, ID, MT, SD, WY, CO, UT, NE, NH, WA

ATTRIBUTES

Productive soil	8
Marginal soil	8
Yield	8
Drought tolerance	8
Plant health	7
Green snap	8
Drydown	9
Plant population	16-32k
Use	Dual Purpose

SPECS

Maturity	90 days
Silking (GDU)	1140
Black layer (GDU)	2290
Ear type	Semi-Flex
Plant height	Medium
Test weight	Very Good
Corn on corn	Very Good
Early plant vigor	Very Good
Root rating	Good
Stalk rating	Very Good
Goss Wilt	Excellent
Gray Leaf Spot	Average
Northern Leaf Blight	Very Good
Stalk Anthracnose	Good
