24P08

108 Day Corn Hybrid

KEY BENEFITS

- Short plant with girthy ears and great kernel depth
- Excellent plant health with high test weight grain in the central Corn Belt
- Strong early vigor ensures quick establishment and standability

HYBRID OVERVIEW

Healthy hybrid with short plant style and girthy ears. This hybrid pops out of the ground and grows into a healthy, solid standing hybrid with great kernel depth. Best adapted to the central Corn Belt, offering a cost-effective solution for growers seeking high test weight and early maturity.

PERFORMANCE ATTRIBUTES Productive Soil 9 Marginal Soil 7 Drought Tolerance 8 Yield 9 Plant Health 9 Green Snap 8 Drydown 8 Plant Population 26-36k Primary Use Grain

PRODUCT IMAGES

Nebraska Test Plot - Fall 2024

Placement Recommendations

Moderate to highly productive acres at moderately high plant populations.

Agronomic Tips

To maximize yield potential, keep it within the 110 RM zone and avoid high pH soils. Its strong root system and excellent plant health ensure stability under stress.

Growing Regions

 \bullet NE (eastern), SD, IA, IL, IN, OH, WI, MI

Market & Usage

Designed primarily for grain production, 24P08 offers a budget-friendly option for growers in its optimal regions. Its genetic similarity to 23P11, with improved test weight and earlier maturity, makes it a strategic choice for those seeking reliable performance.

TECHNICAL SPECIFICATIONS

Silking	1360
Black Layer	2700
Ear Type	Semi-Determinate
Plant Height	Short
Test Weight	Very Good
Corn On Corn	Excellent
Early Plant Vigor	Excellent
Root Rating	Excellent
Stalk Rating	Excellent
Goss Wilt	Very Good
Gray Leaf Spot	Excellent
Northern Leaf Blight	Very Good
Stalk Anthracnose	Excellent
Maturity	108
