24W13

113 DAY
CORN SEED HYBRID

PERFORMER

KEY BENEFITS

- White, food grade hybrid with moderate stature
- Excellent disease package
- Excellent staygreen

DESCRIPTION

24W13 is a healthy stable hybrid that performs very well in its RM zone (do not drag it south to 118+ RM regions). It has an excellent foliar disease package and maintains good plant health and a solid stalk late in the fall. 24W13's pearly white grain will impress even the most discerning grain buyers.

WHERE IT FITS

Irrigated or highly productive acres

INBRED SELECTION

Male is brings health and staygreen; Female works broadly

GEOGRAPHIC REGIONS

Eastern KS, NE, IA, IL, IN, KY, MO

ATTRIBUTES

Productive soil	
Marginal soil	
Yield	
Drought tolerance	
Plant health	
Green snap	
Drydown	
Plant population	26-33K
Use	Grain

SPECS

Maturity	113 days
Silking (GDU)	1390
Black layer (GDU)	2740
Ear type	Semi Determinate
Plant height	Med-short
Test weight	Excellent
Corn on corn	Good
Early plant vigor	VeryGood
Root rating	Good
Stalk rating	Very Good
Goss Wilt	Excellent
Gray Leaf Spot	Good
Northern Leaf Blight	Good
Stalk Anthracnose	Good
