CORN SEED HYBRID

PERFORMER

KEY BENEFITS

- Works just about anywhere
- Extremely adaptable to soil types
- Excellent Goss Wilt protection
- Silage or Grain

DESCRIPTION

From east to west, 25X01 is a great fit for just about any region. It has good yield potential, is very adaptable to different soil types, and shows excellent resistance to Goss's Wilt. This hybrid's adaptability makes it an excellent choice for growers looking to plant across a range of yield environments. It shows very good drought tolerance for dryland production/marginal acres, but is also a good fit for highly productive rainfed or irrigated acres.

WHERE IT FITS

Just about any soil type or growing environment.
