

H116S

116 DAY CORN SEED HYBRID

ADAPTABLE

KEY BENEFITS

- Specifically bred for Southern growers with wide canopy
- Genetically distinct with unique traits
- Consistent performance across all soil types

HYBRID OVERVIEW

H116S is a hybrid bred specifically for the South (not just a Midwestern-type hybrid simply pushed South). This 116 Day canopies very effectively, which allows for better in-season weed control especially when planting on wide row spacing. With good drought tolerance, this hybrid works on all soil types, including moderately high-productive acres. Genetically, it's very unique compared to other hybrids on the market.

PLACEMENT RECOMMENDATIONS

Southern growers - dryland or irrigated.

AGRONOMIC TIPS

Robust hybrid that canopies wide rows well. Its strong drought tolerance ensures consistent performance, even under stress.

SUITABLE GROWING REGIONS

NC, SC, GA, AL, MS, TN, AR, TX, AZ, NM, CA, ID, UT, CO (silage), VA

ATTRIBUTES

Productive Soil	9
Marginal Soil	8
Drought Tolerance	8
Yield	9
Plant Health	6
Green Snap	3
Drydown	6
Plant population	24-30K
Use	Dual Purpose

SPECS

Silking	1480
Black Layer	2820
Ear Type	Semi-Flex
Plant Height	Very Tall
Test Weight	Good
Corn On Corn	Good
Early Plant Vigor	Average
Root Rating	Good
Stalk Rating	Average
Goss Wilt	Excellent
Gray Leaf Spot	Fair
Maturity	116
