

KEY BENEFITS

- Excels in low population, super-tough conditions in Western NE/KS, the Dakotas and Northeast CO
- Preferred by growers prioritizing advanced agronomics

HYBRID OVERVIEW

24P96 offers considerable top end yield potential, but brings along resiliency and has the ability to withstand less than ideal growing conditions. It has great root strength and is a very versatile variety that grows well in different regions and growing conditions. Well suited for irrigated or dryland acres and can be planted anywhere from 15k-38k populations. Have to watch Goss's wilt on this variety, but otherwise is a homerun product.

PERFORMANCE ATTRIBUTES

Productive Soil	9
Marginal Soil	9
Drought Tolerance	9
Yield	9
Plant Health	6
Green Snap	6
Drydown	9
Plant Population	12k-34k
Primary Use	Grain

PRODUCT IMAGES

Nebraska Test Plot - Fall 2024

Placement Recommendations

All soil types and poor to moderately productive acres

Agronomic Tips

Leverage 24P96's strong root system and moderate stalk strength for optimal performance. It shines in drought conditions, maintaining ear size and yield potential even under stress. Adjust planting populations to maximize yield and ensure stability.

Growing Regions

- NY, PA, MI, MN, WI, ND, ID, MT, SD, WY, CO, UT, IA, IN, IL, OH

Environmental Adaptability

This hybrid is part of a select group that excels in Western Nebraska/Kansas and /Northeast CO, low population, super-tough conditions, demonstrating its ability to withstand challenging environments.

TECHNICAL SPECIFICATIONS

Silking	1220
Black Layer	2350
Ear Type	Semi-Flex
Plant Height	Medium
Test Weight	Fair
Corn On Corn	Very Good
Early Plant Vigor	Very Good
Root Rating	Excellent
Stalk Rating	Good
Goss Wilt	Average
Gray Leaf Spot	Average
Northern Leaf Blight	Average
Stalk Anthracnose	Average
Maturity	96
