

25X83

83 DAY CORN SEED HYBRID

ADAPTABLE

KEY BENEFITS

- Better silage size in early maturity for northern regions
- Exceptionally stable in challenging conditions
- Genetically distinct from our other early hybrids

PRODUCT IMAGES

Nebraska Test Plot - Fall 2024

HYBRID OVERVIEW

25X83 is a versatile corn hybrid that thrives in diverse conditions. Its strong seedling vigor allows for a strong start even in cold soils, making it ideal for early planting in northern regions. Its exceptional drought tolerance ensures consistent performance across various field conditions, providing stability rather than just top-end yield.

PLACEMENT RECOMMENDATIONS

Versatile: Works well in conditions ranging from productive to marginal.

AGRONOMIC TIPS

This hybrid boasts strong stalks but moderate root strength, so consider adjusting planting populations to maximize yield potential and ensure stability. It maintains ear size and yield potential even under drought stress, making it a resilient option for challenging conditions.

SUITABLE GROWING REGIONS

Northern States
WA, MT, ND, MN, WI, ID, ME, NH, VT, SD, WY, MI, NY, NE
82-87 RM "regions"

MARKET & USAGE PROFILE

Suitable for both grain and silage, offering better silage size compared to other options in its maturity range.

ATTRIBUTES

| | |
|-------------------|--------------|
| Productive Soil | 9 |
| Marginal Soil | 8 |
| Drought Tolerance | 9 |
| Yield | 8 |
| Plant Health | 7 |
| Green Snap | 7 |
| Drydown | 9 |
| Plant population | 14-32K |
| Use | Dual Purpose |

SPECS

| | |
|-----------------------------|-----------|
| Silking | 1075 |
| Black Layer | 1920 |
| Ear Type | Semi-Flex |
| Plant Height | Medium |
| Test Weight | Very Good |
| Corn On Corn | Very Good |
| Early Plant Vigor | Excellent |
| Root Rating | Very Good |
| Stalk Rating | Good |
| Goss Wilt | Very Good |
| Gray Leaf Spot | Very Good |
| Northern Leaf Blight | Very Good |
| Stalk Anthracnose | Very Good |
| Maturity | 83 |
