25X90

90 DAY
CORN SEED HYBRID

PERFORMER

KEY BENEFITS

- Rugged hybrid excelling in drought with 'ear on a stick' for swift harvest
- Emerges well in heavy residue, perfect for no-till operations

HYBRID OVERVIEW

25X90 (close relative to 25X94) is like an old school linebacker. Tough, kinda ugly, can take it hit, and plays hard on every down. Very versatile hybrid that will fit across a wide range of soil types and emerges well in heavy residue. It has excellent drought tolerance, maintaining its ear size and yield potential even under stress. Its unique "ear on a stick" appearance at harvest ensures a swift and efficient combine experience.

PLACEMENT RECOMMENDATIONS

Adaptable across various soil types: consistency in both productive and marginal soils.

AGRONOMIC TIPS

Maximize 25X90's potential by leveraging its strong root system and moderate stalk strength. Adjust planting populations to enhance yield stability. Its resilience in drought conditions makes it a standout performer, maintaining ear integrity even when the tops break late in the season.

SUITABLE GROWING REGIONS

Northern states
 ND, SD, MN, WI, MT, NY, MI, ID, CO, NM, WY, WA
 Does not go south

MARKET & USAGE PROFILE

Dual-purpose hybrid suitable for both grain and silage, offering high-quality silage with highly digestible stalks.

ATTRIBUTES

Productive Soil	8
Marginal Soil	9
Drought Tolerance	9
Yield	8
Plant Health	6
Green Snap	7
Drydown	9
Plant population	12-36k
Use	Dual Purpose

SPECS

Silking	1115
Black Layer	2280
Ear Type	Flex
Plant Height	Medium
Test Weight	Fair
Corn On Corn	Very Good
Early Plant Vigor	Excellent
Root Rating	Excellent
Stalk Rating	Good
Goss Wilt	Average
Gray Leaf Spot	Average
Northern Leaf Blight	Very Good
Stalk Anthracnose	Good
Maturity	90
