

25D13

113 DAY CORN SEED HYBRID

KEY BENEFITS

- Upgraded version of 23D13 with stronger roots and higher yields
- Known as the "Green Machine" for exceptional plant health
- · Improved ear girth and test weight

PRODUCT IMAGES

Nebraska Test Plot - Fall 2024

HYBRID OVERVIEW

25D13 is a defensive hybrid that performs very well on lower and moderately productive acres. It has an excellent foliar disease package and maintains good plant health late in the Fall. This hybrid performs very well under heat and drought stress. 25D13 is a genetic update to our popular 23D13 hybrid with much better roots and yield potential while carrying all the same defensive traits and excellent testweight. Known as the "Green Machine," it impresses with its vibrant health and adaptability.

PLACEMENT RECOMMENDATIONS

Dryland acres where plant health and stability are desired. Not responsive to irrigation, making it best suited for non-irrigated conditions. Good choice for organic growers due to plant health.

AGRONOMIC TIPS

Be mindful of potential greensnap. Not responsive to irrigation.

SUITABLE GROWING REGIONS

Eastern KS, Eastern NE, IA, IL, IN, KY, TN, NC, SC, DE, MD, VA, OH, PA

MARKET & USAGE PROFILE

Primarily intended for grain production, 25D13 is also suitable for food-grade purposes, offering versatility for growers targeting different markets.

ATTRIBUTES
