25X15

115 DAY
CORN SEED HYBRID

ADAPTABLE

KEY BENEFITS

- Full flex ear for maximum yield under irrigation
- Improved leaf disease resistance
- Early flowering aids reliability

HYBRID OVERVIEW

25X15 is all about top end horsepower. With its full flex ear, it offers exceptional flexibility in both length and girth, ensuring robust yields even in variable conditions. While it tends to retain moisture slightly longer, its early flowering for its maturity class makes it a reliable choice. The disease resistance package is a notable improvement over similar hybrids like 42X14 and 24P14, providing enhanced protection against common leaf diseases.

PLACEMENT RECOMMENDATIONS

Productive acres that have variable soil types. Thrives under irrigation.

AGRONOMIC TIPS

To harness the full potential of 25X15, manage for a timely harvest to mitigate its tendency to hang wet. Its strong drought tolerance and adaptability to both dryland and irrigated conditions make it a versatile choice for diverse growing environments.

SUITABLE GROWING REGIONS

ID, UT, CO, CA, UT, NV, OK KS, NE, IA, TX, NM, IL, IN, PA, DE, MD, VA, NC, KY, TN, MO, AR

ATTRIBUTES

Productive Soil	<div style="width: 90%;"><div style="width: 90%;"></div></div> 9

Drought Tolerance	<div style="width: 90%;"><div style="width: 90%;"></div></div> 9
Yield	<div style="width: 90%;"><div style="width: 90%;"></div></div> 9
Plant Health	<div style="width: 70%;"><div style="width: 70%;"></div></div> 7
Green Snap	<div style="width: 70%;"><div style="width: 70%;"></div></div> 7
Drydown	<div style="width: 70%;"><div style="width: 70%;"></div></div> 7
Plant population	12-32K
Use	Dual Purpose

SPECS

Silking	1375
Black Layer	2770
Ear Type	Flex
Plant Height	Medium
Test Weight	Good
Corn On Corn	Good
Early Plant Vigor	Good
Root Rating	Average
Stalk Rating	Average
Goss Wilt	Excellent
Gray Leaf Spot	Very Good
Northern Leaf Blight	Good
Stalk Anthracnose	Average
Maturity	115
