

25D18

118 DAY CORN SEED HYBRID

KEY BENEFITS

- · Tough hybrid for hot, dry climates with higher yields
- · Long, thick husks reduce mycotoxin risks
- · Ideal for silage under stress

Nebraska Test Plot - Fall 2024

HYBRID OVERVIEW

25D18 is designed for the toughest growing conditions. With its roots tracing back to the "tough as nails" H117SC, this hybrid thrives in hot, dry climates and on marginal soils. It offers a robust health package and a heavier test weight, making it a top choice for both grain and silage production. Its long, thick husks help protect against mycotoxins, ensuring clean, high-quality grain. While it excels in challenging environments, 25D18 is not recommended for high-yield, irrigated acres but shines in silage production under these conditions.

PLACEMENT RECOMMENDATIONS

Perfect for your toughest acres, 25D18 is ideal for growers seeking reliability in challenging environments. It performs exceptionally well in areas with limited rainfall and on marginal soils.

AGRONOMIC TIPS

For optimal results, avoid planting 25D18 on high-yield acres.

SUITABLE GROWING REGIONS

Dual purpose: NC, SC, GA, AL, MS, TN, AR, TX, AZ, VA, OK, KS, NE, IN Silage: CA, ID, UT, NM, CO, WY, PA, OH

ATTRIBUTES

Productive Soil	7
Marginal Soil	9
Drought Tolerance	9
Yield	8
Plant Health	7
Green Snap	6
Drydown	4
Plant population	17-32k

Dual Purpose

SPECS

Use

SPELS	
Silking	1475
Black Layer	2810
Ear Type	Flex
Plant Height	Very Tall
Test Weight	Very Good
Corn On Corn	Good
Early Plant Vigor	Good
Root Rating	Good
Stalk Rating	Good
Goss Wilt	Very Good
Gray Leaf Spot	Good
Northern Leaf Blight	Very Good
Stalk Anthracnose	Very Good
Maturity	118
