

## KEY BENEFITS

- Does very well on tough soils
- Remarkable drought and heat tolerance
- Great fit for southern growers
- Silage or grain depending on soil

## HYBRID OVERVIEW

25D18G is exceptional in areas where summers tend to be hot and dry. It is a workhorse variety that performs very well on marginal ground. Long, thick husks reduce the potential for problems with mycotoxins producing clean grain. This 118 Day gives great tonnage when chopping for silage and is an excellent fit for grain production on tough soils and in areas with limited rainfall. Not well suited for grain on highly productive, irrigated acres but does produce incredible silage tonage in these production systems.

## PERFORMANCE ATTRIBUTES

Productive Soil	<div style="width: 70%;"><b>7</b></div>
Marginal Soil	<div style="width: 90%;"><b>9</b></div>
Drought Tolerance	<div style="width: 90%;"><b>9</b></div>
Yield	<div style="width: 80%;"><b>8</b></div>
Plant Health	<div style="width: 70%;"><b>7</b></div>
Green Snap	<div style="width: 60%;"><b>6</b></div>
Drydown	<div style="width: 40%;"><b>4</b></div>
Plant Population	<b>17-32k</b>
Primary Use	<b>Dual Purpose</b>

## Placement Recommendations

This is the hybrid for your toughest acres.

## Growing Regions

- Dual purpose: NC, SC, GA, AL, MS, TN, AR, TX, AZ, VA, OK, KS, NE, IN
- Silage: CA, ID, UT, NM, CO, WY, PA, OH

## TECHNICAL SPECIFICATIONS

Silking	<b>1475</b>
Black Layer	<b>2810</b>
Ear Type	<b>Flex</b>
Plant Height	<b>Very Tall</b>
Test Weight	<b>Very Good</b>
Corn On Corn	<b>Good</b>
Early Plant Vigor	<b>Good</b>
Root Rating	<b>Good</b>
Stalk Rating	<b>Good</b>
Goss Wilt	<b>Very Good</b>
Gray Leaf Spot	<b>Good</b>
Northern Leaf Blight	<b>Very Good</b>
Stalk Anthracnose	<b>Very Good</b>
Maturity	<b>118</b>
