H116S

116 DAY CORN SEED HYBRID

KEY BENEFITS

- Bred specifically for southern growers
- Robust hybrid
- Silage or grain

DESCRIPTION

H116S is a hybrid bred specifically for the South (not just a Midwestern-type hybrid simply pushed South). This 116 Day canopies very effectively, which allows for better in-season weed control especially when planting on wide row spacing. With good drought tolerance, this hybrid works on all soil types, including moderately high-productive acres. Genetically, it's very unique compared to other hybrids on the market.

WHERE IT FITS

Southern growers - dryland or irrigated.

GROWER NOTES

Robust hybrid that canopies wide rows well.

GEOGRAPHIC REGIONS

NC, SC, GA, AL, MS, TN, AR, TX, AZ, NM, CA, ID, UT, CO (silage), VA

ATTRIBUTES

Productive soil	
Marginal soil	
Yield	
Drought tolerance	
Plant health	
Green snap	
Drydown	
Plant population	24-30K
Use	Dual Purpose

SPECS

Maturity	116 days
Silking (GDU)	1480
Black layer (GDU)	2820
Ear type	Semi-Flex
Plant height	Very Tall
Test weight	Good
Corn on corn	Good
Early plant vigor	Average
Root rating	Good
Stalk rating	Average
Goss Wilt	Excellent
Gray Leaf Spot	Fair
Northern Leaf Blight	N/A
Stalk Anthracnose	N/A
