H117SC

117 DAY
CORN SEED HYBRID

TOUGH AS NAILS

KEY BENEFITS

- Does very well on tough soils
- Remarkable drought and heat tolerance
- Great fit for southern growers
- Silage or grain depending on soil

DESCRIPTION

H117SC does exceptionally well in areas where summers tend to be hot and dry. It is a workhorse variety that performs very well on marginal ground. Long, thick husks reduce the potential for problems with mycotoxins. This 117 Day gives good tonnage when chopping for silage and is an excellent fit for grain production on tough soils and in areas with limited rainfall. Not well suited for grain on highly productive, irrigated acres.

WHERE IT FITS

This is the hybrid for your toughest acres.

GROWER NOTES

Keep off high-yield acres.

GEOGRAPHIC REGIONS

Dual purpose: NC, SC, GA, AL, MS, TN, AR, TX, AZ, VA, OK, KS, NE, IN

Silage: CA, ID, UT, NM, CO, WY, PA, OH

ATTRIBUTES

Productive soil	5
Marginal soil	9
Yield	7
Drought tolerance	9
Plant health	8
Green snap	7
Drydown	7
Plant population	17-32k
Use	Dual Purpose

SPECS

Maturity	117 days
Silking (GDU)	1475
Black layer (GDU)	2810
Ear type	Flex
Plant height	Tall
Test weight	Very Good
Corn on corn	Good
Early plant vigor	Good
Root rating	Good
Stalk rating	Good
Goss Wilt	Very Good
Gray Leaf Spot	Good
Northern Leaf Blight	Very Good
Stalk Anthracnose	Very Good
