H3163

119 DAY
CORN SEED HYBRID

PERFORMER

KEY BENEFITS

- Huge high-yield potential
- Bred for the south
- Girthy ear type

DESCRIPTION

H3163 is a hybrid bred to perform extremely well on Southern soils where moisture is adequate. It shows very good stress tolerance to disease and heat, but needs adequate moisture to reach its true yield potential. If you are looking for a hybrid to take full advantage of productive, Southern soils — this is it.

WHERE IT FITS

Good fertility and yield potential on ground with moisture.

GROWER NOTES

Not drought tolerant.

GEOGRAPHIC REGIONS

VA, NC, SC, GA, AL, MS, TN, KY, AR, LA

ATTRIBUTES

Productive soil	9
Marginal soil	5
Yield	9
Drought tolerance	5
Plant health	8
Green snap	4
Drydown	7
Plant population	26-32k
Use	Grain

SPECS

Maturity	119 days
Silking (GDU)	1475
Black layer (GDU)	2870
Ear type	Semi-Flex
Plant height	Medium
Test weight	Good
Corn on corn	Good
Early plant vigor	Good
Root rating	Good
Stalk rating	Average
Goss Wilt	Very Good
Gray Leaf Spot	Very Good
Northern Leaf Blight	Very Good
Stalk Anthracnose	Very Good
