H98S1

98 DAY
CORN SEED HYBRID

PERFORMER

KEY BENEFITS

- Goes on productive soil
- Great top end potential
- Outstanding test weight

HYBRID OVERVIEW

H98S1 can fit just about anywhere you need a 98 day with high yield potential for productive soils. It doesn't show great drought tolerance, so it is a better fit for irrigated acres or for regions that get adequate precipitation. We recommend keeping this off of your marginal soils. Shows excellent test weight for grain, and expresses itself as a large plant that can work very well for silage.

PLACEMENT RECOMMENDATIONS

Productive soils with adequate moisture.
